Alex Example

Platform engineer: reliable services, clear operations, calm releases

e2e-alex@example.org | +33 6 00 00 00 00 | Lyon, France | example.org/alex | code.example.org/alex

Profile

Platform engineer who designs, ships and operates the services other teams build on. Known for turning fragile manual steps into automated, observable pipelines, and for writing the runbook before the incident rather than after it.

Education

2018 to 2020 — **MSc Computer Science**
Université Exemple

2015 to 2018 — **BSc Mathematics**
Institut Échantillon

Experience

February 2023 to present — **Senior Software Engineer**
Example Corp, Lyon, France

- Designed the internal deployment pipeline used by every product team, with staged rollouts, automatic rollback and a release note generated from the merged changes.
- Led the move of the billing services to managed Postgres, rehearsed twice on copies of production before the cut over weekend.
- Wrote the incident playbook and ran the reviews after each outage, turning each finding into a tracked change.
- Published the service catalogue at Example-Corp-Platform-Service-Catalogue-https://catalogue.internal.example.org/platform/services/overview/with/a/very/long/path/that/never/breaks so every team finds its owners.

September 2020 to January 2023 — **Software Engineer**
Sample Labs, Grenoble, France

- Built the metrics stack with dashboards per team and alerts that page only on user impact.
- Maintained the shared Python libraries and their release process.
- Automated the onboarding of new engineers from a script and a checklist.

February 2020 to July 2020 — **Engineering Intern**
Demo Industries, Annecy, France

- Wrote a test harness for the factory floor data collectors.

Selected achievements

1. Cut release preparation from days to an hour
2. Owned the on call rotation of three services
3. Introduced typed contracts between teams

Key competencies

Service design; CI and CD; Observability; PostgreSQL; Kubernetes; Incident response; Python; Technical writing

Skills

Languages	Python, Go, SQL, Bash
Platform	Kubernetes, Docker, Terraform, GitHub Actions
Data	PostgreSQL, Redis, Kafka
Practice	Code review, Runbooks, Postmortems

Languages

French: native; **English**: fluent; **German**: intermediate
